

### C3S-RC-M22

The C3S-RC-M22 is a remote controller for the Compax3 driver developed by EMAC Ltd. The Remote controller enable simulation digital I/O, 2 analog inputs, 1 encoder and signalling auxiliary voltages.

#### List of items and parameters C3S-RC-M22

Description	Quantity
Switch	20x
LED diode	19x
Analog potentiometer	2x
Encoder	1x
Connection cable (2m)	3x
Case	1x
Weight (kg): 0,5	
Size (mm): 200x150x70	
Power supply: from Compax3 +24VDC, +5VDC	

#### Description remote controller C3S-RC-M22

Inputs X11:  
 2x Potentiometer  $\pm 10VDC$   
 1x Encoder +5VDC

Digital I/O X12  
 8x Digital inputs  
 4x Digital outputs

Digital I/O X22

Price: 250 EUR

Lead time: 3 weeks
